PROFESSIONAL SUMMARY

Professional React Native Developer with 2+ years of experience building scalable, high-performance mobile applications for Android and iOS. Skilled in React Native, TypeScript, Node.js, Express.js, MongoDB, and Firebase for end-to-end mobile and full-stack product delivery. Expertise in REST API design, real-time systems, authentication, and production-grade mobile architecture. Known for strong problem-solving skills, clean-architecture discipline, and the ability to thrive in fast-moving product teams. Creator and maintainer of OpenOTA, an open-source over-the-air update system for React Native. Adept at owning features end-to-end – from mobile UI through backend APIs to app-store deployment.

PROFESSIONAL EXPERIENCE

React Native Developer
Techefficio Solutions, Hyderabad, India
Feb 2026 – Till Now

Roles & Responsibilities

- Developing scalable Android and iOS applications using React Native and TypeScript.
- Implementing clean architecture patterns and production-grade reusable systems.
- Collaborating with cross-functional teams to deliver high-quality mobile experiences.
- Optimizing performance, responsiveness, and application stability.

React Native Developer
Algorizz Technologies
Mar 2025 – Dec 2025

Roles & Responsibilities

- Delivered production-ready mobile features for Android and iOS platforms.
- Implemented subscription workflows and premium access systems.
- Integrated REST APIs with optimized network handling and error management.
- Improved application stability and reduced production issues.

React Native Developer (Contract)
WebSeeder Technologies
Apr 2025 – May 2025

Roles & Responsibilities

- Built and refactored reusable UI components, improving development consistency.
- Improved navigation flows and reduced unnecessary re-renders for smoother UX.
- Integrated third-party APIs with proper error handling and response management.

React Native Developer (Part-Time)
Bliptyn Technologies
Dec 2024 – Mar 2025

Roles & Responsibilities

- Developed new application modules using React Native and TypeScript.
- Implemented real-time updates and communication using WebSockets.
- Resolved navigation and state management related issues.

React Native Developer
Freelance

2025 – Till Now

Roles & Responsibilities

- Developing custom mobile applications for startup and business clients.
- Delivering scalable mobile solutions including UI implementation, API integration, and deployment.
- Collaborating directly with clients to transform business requirements into production-ready applications.

React Native Intern

WebMOBI

Aug 2024 – Dec 2024

Roles & Responsibilities

- Worked on React Native application development and feature implementation.
- Assisted in API integrations, debugging, and mobile UI development.
- Gained hands-on experience in scalable mobile application workflows.

KEY PROJECT EXPERIENCE

NearDeals (Location-Based Commerce Platform)
Production

Technology Used: React Native, Node.js, Express.js, MongoDB, REST APIs

- A location-based marketplace enabling users to discover nearby deals, offers, stores, and local businesses – supporting both single dealers and multi-branch chain dealers, each with an independent catalog and store profile.
- Developed and maintained core React Native mobile features and the product/catalog backend domain (models, services, controllers, validation).
- Integrated REST APIs, authentication, and real-time data synchronization.
- Implemented location-based store and product discovery, ranking results by distance.
- Optimized application performance, navigation, and state management for production release.
- Implemented push notifications and a scalable backend architecture supporting a growing store network.

Android: <https://play.google.com/store/apps/details?id=com.neardeals>

OpenOTA (Open Source – Creator & Maintainer)
Ongoing

Technology Used: React Native, Node.js, Open Source (GitHub)

- An open-source over-the-air (OTA) update system for React Native applications, enabling teams to ship JavaScript-bundle updates directly to users without waiting on app-store review cycles.
- Designed and built the release-channel and update-delivery workflow for React Native apps.
- Implemented rollback support so a bad release can be reverted without a new app-store build.
- Built the client-side integration SDK for checking, downloading, and applying bundle updates.
- Maintained as a public open-source repository for the React Native developer community.

GitHub: <https://github.com/HarshaJrDev/OpenOTA>

HubbleMeet (Professional Networking Platform)

Technology Used: React Native, Firebase, Redux, Node.js

- A professional networking application enabling QR-based digital business cards, video profiles, and real-time communication.
 - Implemented swipe-based networking workflows and profile discovery.
 - Developed QR-based virtual business card systems.
 - Integrated real-time chat, video upload, and subscription workflows.
- Android: <https://play.google.com/store/apps/details?id=com.hubble.app>
iOS: <https://apps.apple.com/in/app/hubblemeet/id6752544354>

Dandar Health (Healthcare Platform)

Technology Used: React Native, Firebase, Video SDK

- A healthcare and telemedicine platform supporting appointments, online consultations, and medicine ordering.
- Implemented appointment booking and online consultation systems.
- Ensured secure handling of user and healthcare-related data.

Android: <https://play.google.com/store/apps/details?id=com.dandarpatient>

My Bash Buddy

Technology Used: React Native, Expo, Firebase

- A business-focused service application designed for scalable mobile experiences and workflow management, shipped to both Android and iOS.

Website: <https://www.mybashbuddy.com/>

Kalanabha Logistics

Technology Used: React, Firebase

- A logistics and transport management platform focused on operational workflow and business efficiency, with optimized navigation and API synchronization.

Website: <https://kalanabhalogistics.in/>

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering (AI & ML)

Kalasalingam Academy of Research and Education | 2021 – 2025

TECHNICAL SKILLS

Mobile: React Native (CLI & Expo), Android, iOS, Play Store & App Store Deployment

Frontend: TypeScript, JavaScript, React.js, Next.js, Redux

Backend & Cloud: Node.js, Express.js, Firebase, Supabase, MongoDB, REST API Design

Core Expertise: REST APIs, WebSockets, Real-Time Systems, Push Notifications, Secure Storage,

System Design, Performance Optimization, Open Source (OTA Release Management)

Tools: Git, GitHub, Android Studio, Xcode, VS Code, Postman, CI/CD
